

Understanding the Influencers 2006

An Analysis of Analyst Relations Effectiveness in Asia/Pacific

Volume 5: Infrastructure Software Vendors

These databooks analyse the responses of analysts who focus partly or wholly on the infrastructure software market, which is broadly characterised by vendors focused around security, system & network management, storage management, and operating systems. They contain quantitative and qualitative analysis of analyst communication and information preferences; specific assessment of vendor analyst relations program performance; insight into the experience levels of infrastructure software analysts; and perspectives on analyst recommendations of vendors to customers.

The databooks include ratings and rankings of analyst perceptions of vendor analyst relations program effectiveness, based on several attributes including resourcing, candour, understanding, proactivity, responsiveness and access to executives.

Figure 11a: Accessibility of Infrastructure Software Vendors – Asia/Pacific, 2006 – 2005

Table of Contents – Infrastructure Software

1. Executive Summary	2
2. Survey Scope & Respondent Demographics	3
2.1 Vendor Focus	3
2.2 Response Sample	3
2.3 Analyst Experience	4
3. Communication & Information Preferences	5
3.1 Preferred Communication Processes	5
3.2 Most Useful Information Types	6
4. Analyst Relations Effectiveness	8
4.1 Analyst Relations Program Effectiveness	8
4.2 AR Program Resourcing	10
4.3 Candour	12
4.4 Understanding of Research Coverage Areas	14
4.5 Proactivity.....	16
4.6 Responsiveness to Information Requests	18
4.7 Access to Executives and Experts	20
4.8 Likelihood of Shortlist Recommendation	22
